

Overview:

As a Low-Code/No-Code Developer, he/she will play a crucial role in designing, developing, and maintaining applications using low-code and no-code platforms such as Appian, OutSystems, and Power Platform and APIs on .NET Core. Developer will work closely with business stakeholders, analysts, and other development teams to create solutions that address complex business needs.

Responsibilities:

- Low Code/No Code Development:
- Design, develop, and maintain scalable and efficient applications using Low Code/No Code platforms.
- Leverage .NET Core for backend development to enhance the functionality of Low Code/No Code solutions.

Technical Expertise:

- Demonstrate excellent knowledge of .NET Core web applications, ensuring optimal performance and reliability.
- Stay updated on the latest trends and advancements in Low Code/No Code development methodologies and incorporate them into our projects.

Collaboration:

- Collaborate with cross-functional teams, including UI/UX designers, product managers, and other developers, to deliver high-quality solutions.
- Work closely with business analysts to understand requirements and translate them into effective Low Code/No Code applications.

Problem Solving:

- Identify and address technical challenges in the development process, ensuring timely and effective resolutions.
- Troubleshoot and debug issues in existing Low Code/No Code applications and .NET Core web applications.

Documentation:

- Create and maintain clear and comprehensive documentation for all Low Code/No Code solutions and .NET Core web applications.

Qualifications:

- Proven experience in developing Low Code/No Code solutions.
- Strong proficiency in .NET Core web application development.
- Familiarity with modern software development methodologies (Agile/Scrum).
- Excellent problem-solving and debugging skills.
- Strong communication and collaboration skills.
- Ability to work independently and as part of a team.

Preferred Skills:

- Experience with popular Low Code/No Code platforms such as Microsoft Power Platform, OutSystems, or Appian.
- Knowledge of front-end technologies such as HTML, CSS, and JavaScript.
- Familiarity with cloud platforms (Azure, AWS, or Google Cloud).

- Certification in Low Code/No Code development or .NET Core.
