EDUCATION

2017-2020
UNIVERSITY OF MUMBAI

- Bachelor in Electrical Engineering

SKILLS

- OutSystems
- ASP.Net MVC C#
- HTML/CSS/Javascript
- MSSQL & Oracle PLSQL

CERTIFICATIONS

- Associate Reactive Developer (Outsystem 11)
- Outsystem Developer Cloud (ODC)
- Microsoft Azure Fundmental
- Front-End Web Development with React

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Marathi (Fluent)

PROFILE

With nearly 3 years of experience in software development, I am a certified OutSystems Reactive and traditional web developer, specializing in OutSystems and .NET technologies. My expertise includes C#, ASP.NET MVC, REST API integration, and database management using Entity Framework, SQL Server, and PLSQL. I am also skilled in frontend technologies like HTML, CSS, JavaScript with React focusing on performance optimization and secure API integration. I play a key role in project teams, delivering enterprise-grade solutions through OutSystems components and .NET frameworks. My work ensures seamless integration and optimized performance.

WORK EXPERIENCE

CAPGEMINI 🔷   2022 - PRESENT

Client: Roche *(Switzerland-based pharmaceutical company)*

- **Duration:** Oct 2023 - Ongoing
- **Details:** Roche Reactive Web | **Team Size:** 7 | **Tools:** OutSystems Service Studio (11), Service Center, Visual Studio, Postman, Jira
- **Skills**: OutSystems Reactive Development, JavaScript, SQL Server, C#

Role and Responsibilities:

- Extended the features and functionality of the pre-existing Roche business application to meet the requirements of growing business needs.
- Collaborated as part of a team to develop new screens, focusing on various forms and UI elements to enhance application functionality and user experience.
- Integrated REST APIs within OutSystems' three-layer architecture, ensuring seamless data interaction and system scalability.
- Managed server-side and client-side aggregates, implementing advanced filtering, sorting, and data action techniques to optimize data retrieval processes and enhance overall application performance.
- Debugged and resolved issues within the web application, improving stability and user satisfaction.
- Focused on optimizing performance and expanding features to support Roche's healthcare operations.

Client: Eneco *(Netherlands-based energy company)*

- **Duration:** 10 months
- **Details:** Module-Eneco MVS Run Phase | **Team Size:** 4 | **Tools:** OutSystems Service Studio (11), Integration Studio, Oracle SQL Developer 19c, Postman
- **Skills:** OutSystems Traditional Web Development, Oracle PLSQL

Role and Responsibilities:

- Designed and implemented user interfaces across multiple screens, ensuring consistency and usability.
- Managed data integration through extension modules, effectively mapping entities to facilitate seamless data flow.
- Developed and executed PLSQL code for backend processes and data exports within OutSystems applications.
- Delivered reliable and efficient web-based solutions tailored to the energy sector.

FLASH ELECTRONICS PUNE

2021 - 2022

Graduate Engineer Trainee

- **Department:** DC Motor Quality Assurance ... (Non-IT)

Responsibilities:

- As a GET in the Quality Department at Flash Electronics, I gained hands-on experience in DC Motor production by performing assigned tasks under managerial guidance, ensuring adherence to quality standards and compliance with established codes and standards.

- My responsibilities included monitoring the motor production process to uphold safety regulations, verifying SOPs and proper tool usage during assembly, maintaining inspection documentation (such as In-process and Pre-Dispatch Inspection reports), analyzing test results to identify issues, tracking root causes, and conducting troubleshooting to resolve product-related challenges.
